Maximize Plant Performance from Root to Fruit

VITOL®, carbon-complexed with Micro Carbon Technology®, feeds the natural metabolic processes within the plant for vegetative development and fruit sizing. It increases the nutrient uptake of the plant and smoothly transitions the plant through its growth stages. It also improves plant recovery from environmental stresses during peak crop demand periods. When soil-applied, VITOL provides necessary nutrients for root growth and elongation that are critical in tap root crops.

BENEFITS OF USE:

- Increase foliar growth at emergence
- Maintain late-season growth & vigor
- Increase fruit size
- Improve uniformity of fruit size
- Give plants energy
- An excellent carrier for other nutrients

WHEN TO APPLY:

- Can be applied to soil as a taproot stimulator.
- Apply VITOL at highest rates together with Huma's COBALT at 2–4 ounces per acre (150–300 mL per hectare) to overcome environmental stresses such as herbicide or salt damage, frost or hail damage, and disease and insect damage.
